

# Tankless Water Heater Service Valves

**NEW!**  
from  
**Dormont**

## A BETTER way to install tankless water heaters

Thousands of builders, installers, and contractors rely on Dormont High Btu Gas Connectors every day when installing tankless water heaters. Today, Dormont Manufacturing is proud to introduce our newest tankless product innovation: the Tankless Service Valve Installation Kit for water line connections. Dormont Service Valves were designed specifically to meet the needs of our customers during installation, as well as the end-user during operation.

That's why Dormont service valves feature dual union connections, color-coded unions and handles, standard 150 psi pressure relief and a layout that eliminates the need for additional spacers.

NOTE: Pressure relief discharge line not shown

### Additional Product Features

- Staggered connection points avoid interference
- Unions feature flats for open-ended wrenches
- Purge/drain ports face forward for easy access
- Tethered caps for added safety and security
- Available cold-water check module, often required for local code compliance.
- Full-port, quarter-turn valves
- Hot and cold service valves certified to NSF/ANSI 61
- Low-lead, forged brass construction
- 600 WOG rated
